

DOMESTIC LAWNMOWERS

2 & 4 STROKE MODELS

SPARE PARTS MANUAL

1996 - 1998

GENUINE

SPARE PARTS

For Quality, Safety and Long Life

About This Manual

The Victa range of domestic rotary lawnmowers is based on 5 different styles of baseplate each of which will have either a Victa 2 Stroke engine or a Tecumseh 4 Stroke engine.

1. Alloy Baseplate "F series" – Identified by the recess at the front where the Victa emblem appears.
2. Alloy Baseplate "K series" – This is the baseplate developed for the Mulch or catch system and has no recess where the emblem appears.
3. Steel Baseplate "Classic series" – This is the most common steel baseplate used and has a flat front with Victa emblem on it (1996/97 models have a badge whereas the 1997/98 models have the emblem embossed on the baseplate). In most applications this baseplate will have a 13 slot plastic height adjustment segment.
4. Steel Baseplate "Standard" – This baseplate is similar to the classic series and will usually have an adhesive label on the leading edge in place of a badge or embossed emblem. This baseplate has no plastic height adjustment segment.
5. Utility baseplate – This baseplate is basically flat and has a side discharge chute with no facility for a grass catcher.

The manual is divided into 13 sections which consist of

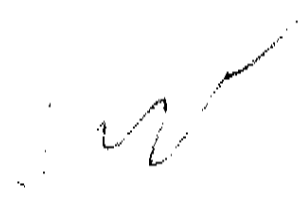

- 2 & 4 stroke versions of each of the baseplates – Sections 1-10
- Additional parts such as 2 Stroke cowlings, filters, etc – Section 11
- 2 Stroke engines, carburettors & ignitions – Section 12
- 4 Stroke engines, carburettors, ignitions & cowlings – Section 13

In order to keep the exploded parts diagrams as simple as possible not every variation of part will be shown. The parts list however will reflect the correct part number for any particular model.

Example 1 – On page 2 the diagram shows the comfort handle (CH85995G) which is used on most F Series models however the Mustang (page 4) uses the extra comfort handle (CH86091G) as stated in the parts list.

Example 2 – On page 76 the diagram shows the Supatrak wheels with wheel bearings however the Sabre (page 82) uses Ribbon Tread wheels with bushes instead of bearings.

It is for this reason that the diagram be used only as a guide for item numbers and that when looking up part numbers the exact parts list for the model is used.
